Family Care Program

We are looking forward to meeting you at your upcoming evaluation!

Dr. Bennett feels that many orthodontic problems can be corrected early when treatment is indicated. Because of that, we like to see our patients for their first examinations around age 7 (unless problems have been detected prior to age 7) to determine if early interceptive treatment would be beneficial. At times we place patients in our Growth and Development Program before more comprehensive treatment is started to achieve maximum benefits.

This is your opportunity to automatically enroll any other siblings for a complimentary, no-obligation orthodontic evaluation at the time of their 7th birthday. A brief examination includes a written report to the child's primary care dentist with Dr. Bennett's findings and recommendations.

Please list any siblings that you would like to have examined sometime around their 7th birthday:

NAME: _____ DOB: _____

NAME: _____ DOB: _____

NAME: _____ DOB: _____

NAME: _____ DOB: _____

Please list below any siblings who are over the age of 7 that you would like to have examined:
